A group of Kids from the neighbourhood enjoyed singing Christmas Carols led by New Robot Tutor from the Japanese Tokyo University of Science, KobaLab.

The Kids loved joining in with the Elephants Karaoke Dance and followed the images on the white SPES interactive board encouraged by smiling Saya.
Then an audio and adventurous ecological interactive story guided the kids way to a forest lake, where they met a friendly frog, and they become aware of the beautiful green forest trees that attract rain drops and keeps our Planet nice & cool.
The kids left after a light lunch and skipped gaily home; enchanted with SAYA, with whom they learnt to say Sayonara - Aurevoir in Japanese.
